

GET MORE GREEN

No matter what your herd, SucraSeed™ will improve the yield.

How can we make such a bold claim? Simple. SucraSeed are the high sugar grass mixes created for specific farming and ranching needs. These high sugar grasses have a test-proven record of improving yield and have been in commercial use in Europe and New Zealand for over eight years. Now, they are available in the US.

The secret is the sugar. SucraSeed has a naturally high concentration of water soluble carbohydrates, which improve the rumen microbe's conversion of grass protein and increase dry matter intake. That means more milk, more meat and less nitrogen emitted as waste. Ask your dealer for details or visit SucraSeed.com

Reap the benefits of SucraSeed:

- Up to 20% higher daily live weight gains
- Up to 6% more milk per cow over grazing season
- Up to 38% more dry matter intake per head per day
- Up to 3% improved diet digestibility
- Environmentally friendly: 24% less feed nitrogen lost in urine and feces
- Non GMO
