

GRAZE BIGGER BEEF

Beef Bank™ will improve daily live weight gain by 20%.

How can we make such a bold claim? Simple. Beef Bank is the SucraSeed mix, containing high sugar grass, created specifically for cattle. These high sugar grasses have a test-proven record of improving daily live weight gain and have been in commercial use in Europe and New Zealand for over eight years. Now, they are available in the US and only in SucraSeed.

The secret is the sugar. High sugar grass has a naturally high concentration of water soluble carbohydrates, which improve the rumen microbe's conversion of grass protein and increase dry matter intake. That means cattle will gain more daily and emit less nitrogen as waste.

Reap the benefits of SucraSeed:

- Up to 20% higher daily live weight gains
- Up to 4.41 lbs more dry matter intake per head per day
- Up to 3% improved diet digestibility
- Environmentally friendly: 24% less feed nitrogen lost in urine and feces
- Non GMO
- Qualifies for organic certification
