Great Gains™ will improve annual stocking rates by 20%.

How can we make such a bold claim? Simple. Great Gains is the SucraSeed mix, containing high sugar grass, created specifically for sheep and goats. These high sugar grasses have a test-proven record of improving stocking rates and milk production and have been in commercial use in Europe and New Zealand for over eight years. Now, they are available in the US and only in SucraSeed.

The secret is the sugar. High sugar grass has a naturally high concentration of water soluble carbohydrates, which improve the rumen microbe's conversion of grass protein and increase dry matter intake. That means bigger animals, more milk and less nitrogen emitted as waste.

Reap the benefits of SucraSeed:

- Up to 20% greater stocking rates
- Up to 4.41 lbs more dry matter intake per head per day
- Up to 3% improved diet digestibility
- Environmentally friendly: 24% less feed nitrogen lost in urine and feces
- Non GMO
- Qualifies for organic certification
