

MILK

MORE

MILK

Cash Cow™ will improve annual milk production by up to 262 gallons per cow.

How can we make such a bold claim? Simple. Cash Cow is the SucraSeed mix, containing high sugar grass, created specifically for dairy. These high sugar grasses have a test-proven record of improving milk yield and have been in commercial use in Europe and New Zealand for over eight years. Now, they are available in the US and only in SucraSeed.

The secret is the sugar. High sugar grass has a naturally high concentration of water soluble carbohydrates, which improve the rumen microbe's conversion of grass protein and increase dry matter intake. That means cows produce more milk and emit less nitrogen as waste.

Reap the benefits of SucraSeed:

- Up to 6% more milk per cow over grazing season
- Up to 4.41 lbs more dry matter intake per head per day
- Up to 3% improved diet digestibility
- Environmentally friendly: 24% less feed nitrogen lost in urine and feces
- Non GMO
- Qualifies for organic certification
